Please try again. Please try again. Register a free business account Please try your search again later. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. Marcos Munoz 5.0 out of 5 stars The first one lasted forever, and we decided that it was time to upgrade. Also figured that getting this at Costco made it easy to return if we didnt like it. It periodically goes on special with a coupon, so that helped, too. This is my first network MFC. We had a Hawking Print Server attached to the old unit, and that worked okay. This one installed very quickly and easily. The network printing has been reliable, whether we are wired or wireless. The duplexing works great, and is a real advantage.

Beside a lot of printing, Ive done scanning, copying, and faxing. It works great. I dont have it set up to receive faxes as thats more than I want to deal with right now, and I was getting spam faxes. The copying often cuts off the left edge, but it is usually not a big deal. If its really important, I can readjust the position. The scanning to my laptop works great, but its not the quality of a standalone scanner. I scanned a lot of old family photos, and decided to go with a Canon CanoScan 8600F, which gives a little better image, and has great software. The one thing that bugs me is that it wrinkles envelopes. Ive tried the different settings, but that hasnt helped. This seems to be a design problem, and Ive seen comments about it before, but hadnt seen anything about it just before I bought the unit. I went to Brothers FAQs and it is addressed. I havent taken the time to try all of their suggested fixes, but wish that this wasnt such a problem. We are considering getting an inexpensive printer to just handle envelopes were a SOHO. Ive had the unit for about 6 months, and two of us print off it in our home office. We still have the starter toner cartridge in, which surprises me. I bought a backup highyield cartridge, but its just been sitting around for months. Hey, Im not complaining about that. Overall, its a great unit, and a lot of bang for the buck. But more importantly Ive used Brother printers for some time now and had faith in this qualityoriented company. Rather than rehash whats been said already Ill list my pros and cons

- 1 This is a Energy Star Vista ready printer. Have Vista on your computer. Just plug this in using your USB port and its set to go. Havent tried it on a network so cant comment.
- 2 Scanner operation is razor sharp. Scans are fast and control over contrast is easy.
- 3 Faxing operation works as expected and is foolproof.
- 4 Toner cost is low compared to other printers. Had problems with wrinkled envelopes though. Try as I might could not fix.

Checked manual and it said to release tension springs in back which kept paper tight to drum. No improvement. Bummer! Everything was great about this printer but one of the most important operations. ARRGH! Then I remembered similar problem with another printer. Went into the 8660s properties and changed the DPI to 1200. Left the springs in back released. Tried an envelope.

BINGO! The speed of the printer was reduced by half but the printouts were sharper than ever and the envelopes came out perfect. Problem solved! 7 Cons Its a little noisy. Umm.cant think of anything else. A great printer and can be had at discounted prices because it seems Brother wants the 8860 to take its place.Additionally, I was aiming to replace a old Apple Laserwriter and an HP3210 Photosmart multifunction that I hve learned to hate. Finally, I just left the corporate world and needed a home office fax machine. I was able to discuss the Brother, HP, Xerox, and Canon solutions with their respective factory reps at the 2008 Macworld exhibition in SF back in January, as well as demo most of the applicable products. So, the Brother unit won the battle of live demos and Costco pricing. Here is how the 8660DN dealt with these missions 1. Faxing Its full featured and just a great performer. I have to send faxes every week due to health insurance and investment order processing. Its easy, fast and has all the memory a home office could ever use. 2. Printing My home network has four computers attached running Mac OSX 10.4 and 10.5 in addition to a laptop running Windows XP. I have WiFi and hardwired connections. I moved the power around, and now its fine. 3. Scanning Both network and USB connected scanning work well and produce moderate to good quality scans. Its not a replacement for a dedicated scanner, but its fine for home office work. Also, the ADF works really well. 4. Copying. Its just great and is a much used features.
